Compressors for passenger car air suspension systems

MARKET LEADING QUALITY FROM WABCO

Increasingly the luxury car and SUV vehicle makers are turning to air suspension, thanks to its ability to combine increased comfort and optimum ride height whatever the terrain or driving situation.

WABCO is the market leader in compressors for passenger car air suspension systems, with more than 4,500,000 units installed by all major car makers. WABCO compressors are fitted as original equipment in a wide range of top class SUVs, premium passenger cars and high-end luxury limousines worldwide.

The compressor is the heart of the air suspension system, pumping air up to a maximum system pressure of 17 bar. It operates oil-free, without maintenance, and is specified to last for the vehicle's whole lifetime. However, in system failures such as leakages or water ingress, the compressor may need to be replaced.

A COST-EFFECTIVE, PLUG AND PLAY SOLUTION FOR YOU AND YOUR CUSTOMERS

WABCO now offers its compressors as stand-alone spare parts for a number of applications. As a result, in case of compressor problems your workshop will no longer be obliged to exchange the complete air supply unit. Instead you can offer a lower cost repair solution with genuine parts that will:

- Be an attractive repair solution for the end user
- Bring new customers to your workshop
- Extend business opportunities for dealers

For more information about how WABCO compressors for passenger car air suspension systems can boost your business, contact your WABCO representative today.

WABCO (NYSE: WBC) is a leading supplier of safety and control systems for commercial vehicles. For over 140 years, WABCO has pioneered breakthrough electronic, mechanical and mechatronic technologies for braking, stability and transmission automation systems supplied to the world's leading commercial truck, trailer and bus manufacturers. With sales of \$2.2 billion in 2010, WABCO is headquartered in Brussels, Belgium. For more information, visit www.wabco-auto.com
